SUMMARY

Full-stack developer and co-founder with a track record of shipping production-grade, AI-integrated web applications. Built and launched Codyza — a live developer community platform serving 13 active contributors — in under 4 weeks using Next.js, TypeScript, and Supabase. Passionate about building tools at the intersection of AI and modern web development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, HTML / CSS

Frontend: React, Next.js 16 (App Router), Tailwind CSS, Framer Motion

Backend & Database: Node.js, Supabase (PostgreSQL), Row-Level Security, REST APIs

AI & Integrations: Gemini AI API, OpenAI API, Claude API

Tools & DevOps: Git, GitHub, Vercel, CI/CD, Resend (transactional email), VS Code

PROJECTS

Co-Founder & Lead Developer · Codyza — Developer Ecosystem Platform Jan 2025 – Present

Next.js · TypeScript · Tailwind CSS · Supabase · Gemini AI · Vercel | codyza.com · [GitHub](https://github.com)

- Co-founded and sole-engineered a production developer platform, onboarding **13 contributors** in under 4 weeks with **zero paid marketing**
- Built an **AI code review pipeline** using Gemini AI — evaluates submissions across 6 quality dimensions and auto-distributes XP, **eliminating 100% of manual review**
- Engineered an **8-tier XP gamification system** — rank progression, streak tracking, leaderboard, and public contributor profiles
- Architected team collaboration features: **Project Groups** with role assignments, **Open Bounties** with XP rewards, and a real-time notification engine
- Implemented production security: **Supabase RLS policies**, JWT auth, **invite-only access control**, and resolved silent policy failures without data loss
- Shipped a full **design system** across 15+ pages — glassmorphism aesthetic, Framer Motion animations, responsive layouts

Solo Developer · AI-Powered SaaS Tool

Summer 2026

Next.js · OpenAI API · Supabase · Stripe

- Building a production SaaS targeting a specific real-world problem — full deployment and case study in progress

EDUCATION

B.S. Computer Science · Southwest Minnesota State University

Expected May 2028

Relevant Coursework: Data Structures · Object-Oriented Design & Programming · Computer Organization & Architecture · Fundamentals of Programming

EXPERIENCE

Student Worker — Cafeteria · TRC · Athletics · Southwest Minnesota State University 2024 – Present

- Balanced part-time work across three campus departments while maintaining full academic course load — demonstrating time management and reliability
